

CASE STUDY

Ballykelly, Ireland

Project information:
November 2020
CONIPUR SP Polymeric
May Green
740m²

CONICA installation partner Sports Ground Specialists NI completed this multi-use games area (MUGA) on behalf of Hawthorn Heights in Ballykelly, Northern Ireland.

Causeway Coast and Glens Borough Council supported the construction of the project to provide the local community with facilities to encourage sport and exercise all year round. The new state of the art facility features a high quality surround including roof net and new 740m² CONICA polymeric surface, finished in green.

The CONICA CONIPUR Polymeric type 4 system is a 13mm polyurethane bound two layer system utilising recycled end of life truck tyres as the shock pad with a spray applied top coat. CONIPUR Polymeric provides an excellent level of permeability, slip resistance and is highly durable. An ideal solution for MUGAs which need to host a diverse range of activities and users.

CONIPUR Polymeric

Water permeable, slip resistant and highly durable multi use sports surface.

13mm polyurethane bound two layer system utilising a recycled SBR shock pad layer topped with a spray applied EPDM coating.

Characteristics:

- Spray applied technology
- Water permeable
- Wide range of bold and vibrant colours available
- Seamless and hard wearing
