

CASE STUDY

Bingham Athletics Track

Bingham, Nottinghamshire, United Kingdom

As part of a long term improvement programme at Bingham Leisure Centre the council included the full refurbishment of the 8 lane **5135m²** athletics track using **CONIPUR SP** re-topping system.

Stage one was a full clean of the track, paramount to the end result, as always preparation is key.

Stage two included replacing the base layer in heavily worn and cracked areas to ensure no underlining base issues for the track in the future.

Stage three we saw the structural spray coating top layer of the CONIPUR SP system applied.

Finally, stage four was the spraying of the new line markings, which completed the project in August 2019.

CONIPUR SP Re-top

Refurbishing all common athletics track systems. Using high-quality polyurethane coatings, together with the best coloured EPDM available.

All CONICA re-topping solutions are designed for an existing track to be refurbished to a standard that would enable full certification to World Athletics requirements, thus ensuring that technical and functional requirements are delivered to the highest level.

SP features:

- Ultra cost effective
- Water permeable
- Seamless and spike resistant
- Wide range of colours
- Fully tested to EN14877
- World Athletics certified
