

CASE STUDY

Institute of Technology, Carlow, Ireland

Project information:

September 2020

CONIPUR SW

Red

7,391m²

CONICA partner and sports surfacing specialist, Tony Patterson Sportsgrounds, completed the installation of the athletics track at The Institute of Technology Carlow.

This challenging installation took almost 1 year to complete following major delays resulting from bad weather and Covid-19. The new track forms the stunning centrepiece of a much larger investment in new facilities.

In total, the College has invested €15 million developing the 31 acre sports campus, making it a world-class outdoor training facility that includes 6 new LED floodlit pitches, a 1.6km looped walking trail, the 400m CONICA supplied athletics track and a pavilion building, including changing rooms, meeting rooms and ancillary space.

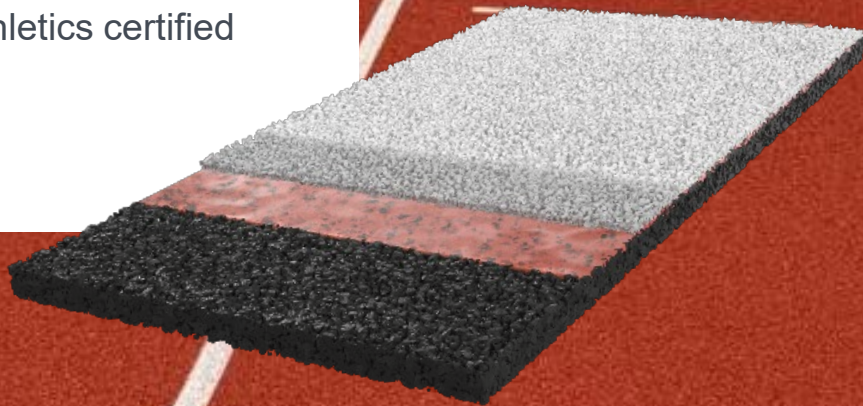

CONIPUR SW

Water impermeable sandwich 'hybrid' athletics track system.

13mm thick polyurethane track, with a PUR-bound elastic layer based on recycled granules, is characterised by its quality and durability, due to its 3mm PUR wear coat.

Characteristics:

- Low life cycle costs
- Water impermeable
- Seamless and spike resistant
- Wide range of colours
- Fully tested to EN14877
- World Athletics certified
