

CONICA

CASE STUDY

Crawfordsburn, Northern Ireland

Project information:
July 2021
Outdoor Wet Pour

Playground surfacing and equipment installation specialist, Garden Escapes, completed this stunning project at a local play area by the Glen Nature Reserve in Crawfordsburn, Northern Ireland.

The existing playground had become very out dated and whilst other landscaping works were being undertaken, including a new car park, the client wanted to create a more vibrant and fun play area that included new play equipment and replacement of the safety surfacing.

The bright EPDM colours chosen complement each other and create a feeling of space, whilst also highlighting the new equipment perfectly.

OUTDOOR WET POUR

Wet pour surfacing is typically installed using two layers; a base layer of SBR recycled tyre rubber granule and a top layer of coloured EPDM granules. Both will be bound using a flexible, single part moisture curing polyurethane binder.

Characteristics:

- EN1177 certified
- Highest quality material and specification
- Wide range of colours
- Excellent UV resistance
