

CASE STUDY

Dunboyne

Meath, Ireland

The existing track was shale and had been previously been tarmacked in preparation for the final surfacing.

The club put funding in place to upgrade to a synthetic surface for the **5500m²** track.

In 2019 **CONIPUR SP** was chosen in red and the installation was completed by the summer of 2019.

To celebrate the completion of the new track, The club hosted an Opening Day for the Dunboyne community on Saturday 19th October - an opportunity for Dunboyne AC to thank everyone for their support over the years in their fundraising efforts and see the results of their support.

CONIPUR SP
