

CASE STUDY

Footes Lane Stadium

Guernsey

This facility in Guernsey needed improvements ready for when it shall host the Island Games in 2021. The event will see around 3,000 competitors from 24 islands around the world take part.

Completed in September 2019, the main task was to extend the track from 6 lanes to 8 lanes and also achieve World Athletics standards and specification.

A full replacement and extension of the old 'porous' track surface with a new non-porous 'sandwich' CONIPUR SW system was completed

The main running track covers 5110m² and was finished in Teal Blue. The internal D's were completed in a CONIPUR SP Light Grey to the clients specification and requirements.

CONIPUR SW

Water impermeable sandwich 'hybrid' athletics track system.

Crack13mm thick polyurethane track, with a PUR-bound elastic layer based on recycled granules, is characterised by its quality and durability, due to its 3mm PUR wear coat.

Features:

- Low life cycle costs
- Water impermeable
- Seamless and spike resistant
- Wide range of colours
- Fully tested to EN14877
- World Athletics certified
