

CASE STUDY

Heydon Bridge High School

Northumberland, United Kingdom

Two new multi-use games areas (MUGAs) were constructed at the Heydon Bridge high school by Cleveland Land Services in May 2020.

Finished with the Conipur SP Green polymeric system, the project was part of a large £4.5m refurbishment of the West Northumberland school.

The project included an overhaul of the buildings and outdoor facilities including a new vocational centre, it was approved by Northumberland County Council.

CONIPUR POLYMERIC

Water permeable, slip resistant and highly durable multi use sports surface.

13mm polyurethane bound two layer system utilising a recycled SBR shock pad layer topped with a spray applied EPDM coating.

Characteristics:

- Spray applied technology
- Water permeable
- Wide range of bold and vibrant colours available
- Seamless and hand wearing
