

## SPORTS FLOORING

Jogging-Track Systems

# CONIPUR JIP comfort+

Impermeable, double layer system

## SYSTEM

Base Layer: *Elastic layer of recycled granules, mixed with high-quality CONICA PUR binder*

Intermediate Layer: *Premium CONIPUR EPDM Granules, mixed with high-quality CONICA PUR binder*

Top Layer: *Polyurethane coating*

Sealing Lacquer: *High-quality, UV stable polyurethane sealing lacquer*

\*CONICA offers an alternative to asphalt or concrete - **CONIPUR J base** – a mixture of recycled tyre rubber granules, crushed stones and binder as the optimum sub-base for jogging tracks.

## APPLICATION

*Outdoor jogging tracks in all climate zones around the world*

## SYSTEM THICKNESS

Sub-base: approx. 35 mm

Jogging system: approx. 18 mm

## ADVANTAGES

- IAAF-certified system
- Significantly higher level of comfort and safety
- High range of colour possibilities enables great design freedom
- Low susceptibility to contamination
- Easy on muscles and joints
- Very durable
- J base as an alternative to concrete or asphalt
- Easy to clean
- Seamless installation
- Suitable for all climate zones around the world
- Odorless and UV stable
