

SPORTS FLOORING

Jogging-Track Systems

CONIPUR JIP soft

Impermeable sandwich system

SYSTEM

Base Layer: *Elastic layer of recycled granules, mixed with high-quality CONICA PUR binder*

Top Layer: *Polyurethane spray coating using premium CONIPUR EPDM Granules, to be applied twice*

Sealing Lacquer (optional): *High-quality, UV stable polyurethane sealing lacquer*

*CONICA offers an alternative to asphalt or concrete - **CONIPUR J base** - a mixture of recycled tyre rubber granules, crushed stones and binder as the optimum sub-base for jogging tracks.

APPLICATION

Outdoor jogging tracks in all climate zones around the world

SYSTEM THICKNESS

Sub-base: approx. 35 mm

Jogging system: approx. 14 mm

ADVANTAGES

- Higher level of comfort and safety
- High range of colour possibilities enables great design freedom
- Low susceptibility to contamination
- Easy to clean
- Very durable
- J base as an alternative to concrete or asphalt
- Quick and easy to install
- Seamless installation
- Suitable for all climate zones around the world
- Odorless and UV stable
