

CASE STUDY

Merryfield Special School, Newcastle

Project information:
September 2020
Outdoor Wet Pour
350m²

LetsPlay
Everywhere

Working on behalf of Pentagon Play, playground design and installation specialist, Let's Play Everywhere, completed this stunning project at Merryfield School in Newcastle.

The 350m² playground had become out dated and the school wanted to create a more vibrant and fun area that included new play equipment and safety surfacing.

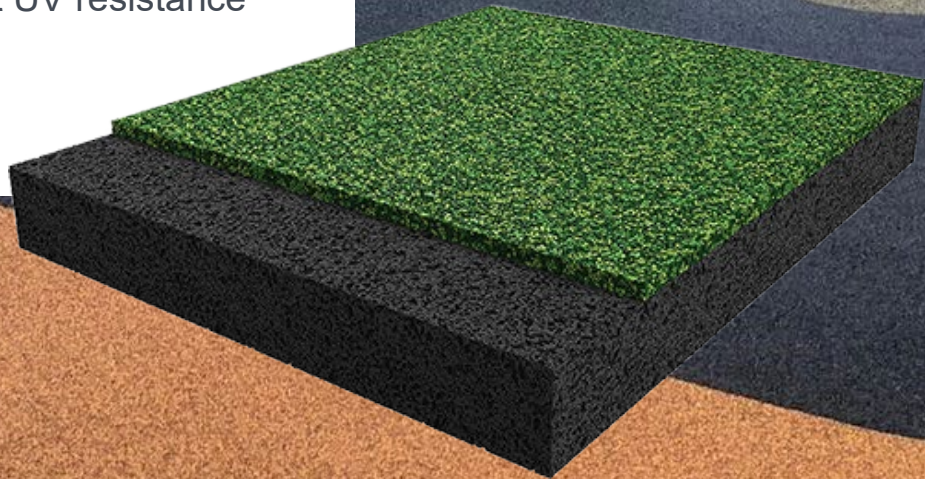

To offer the perfect blend between durability, cost effectiveness and aesthetic appeal, the main areas of safety surfacing were completed using black EPDM, with brighter EPDM blends used to highlight and complement the new equipment.

OUTDOOR WET POUR

Wet pour surfacing is typically installed using two layers; a base layer of SBR recycled tyre rubber granule and a top layer of coloured EPDM granules. Both will be bound using a flexible, single part moisture curing polyurethane binder.

Characteristics:

- EN1177 certified
- Highest quality material and specification
- Wide range of colours
- Excellent UV resistance
