

## CASE STUDY

### Whitley Bay Athletics Track

#### Whitley Bay, Tyne & Wear, United Kingdom

The 4500m<sup>2</sup> six-lane 400 metre athletics track owned by North Tyneside Council was recently resurfaced using CONICA's CONIPUR SP high performance track finish to bring the facility into line with new competition standards introduced by UK Athletics in 2019.

The project scope also included all the track inner kerb & mowing margin being replaced, new drainage for the track infield, a new IAAF throwing cage was also supplied and installed among other equipment to bring the facility up to date with current guidelines. Work was also carried out to install a new perimeter fence and entry system to protect the track from misuse.

The project started before Covid-19 lockdown, which meant a delay was unavoidable, but the project was resumed in May and handed over on 16<sup>th</sup> July.

## **CONIPUR SP**

### **Water permeable spray coated athletics track system**

13mm thick polyurethane track system, with a PUR-bound elastic layer based on recycled granules and a 3mm PUR spray coating as a top layer

#### **Features:**

- Ultra cost effective
- Water permeable
- Seamless and spike resistant
- Wide range of colours
- Fully tested to EN14877
- World Athletics certified
