

## CASE STUDY

### Erewash Golf Course

#### Ilkeston, Derbyshire, United Kingdom

Erewash Valley golf club were looking to improve their facilities in the summer of 2018. One of the main issues Golf Clubs face is the heavy wear of areas between the tees and the greens.

CONICA were asked to offer advice and had a meeting with one of the club's board members in charge of implementing this project.

Two areas were allocated: the 1<sup>st</sup> tee and the 14<sup>th</sup> tee. It was agreed that the paths would be prepared using a concrete base and the CONIPAVE RA system as the top wearing surface which is a blend of mix granular SBR rubber and coloured stone. Red was the chosen colour for this 440m<sup>2</sup> project. The club were delighted with the surface its durability and improved appearance.

## CONIPAVE RA

**The perfect solution for projects requiring outstanding levels of water permeability.**

Recycled SBR truck tyre rubber and decorative aggregate blend, in conjunction with a flexible, moisture curing polyurethane binder to create a high strength surface.

### **Areas of application:**

- Golf course pathways
- Care home hard landscaping
- School daily mail tracks
- Canal and cycle paths
- Equestrian areas
- Nature trails

### **Features:**

- Excellent water permeability
- High levels of slip resistance
- Easy, low cost installation
- Decorative with bespoke finishes available
